*Proceedings of the Dewan to His Highness the Maha Raja of Mysore,
(Revenue),—dated 6th May 1881.*

READ—

Letter No. 10, dated 28th April 1881, from Messrs. Davy, Muddappa & Co.

No. 845-53—14, DATED BANGALORE, 6TH MAY 1881.

ORDER THEREON.—The proceedings quoted in the margin which are still in force permit the contractors to pay into the Taluk Treasuries, the toddy khists of each month in as many instalments within that month as the contractors find it convenient to do so, provided that the sum paid on any one occasion does not fall below five hundred rupees; this limit not being applicable when the contractors make only one single payment in a whole month in which case sums below Rs. 500 may also be received. But smaller sums than Rs. 500 cannot be received oftener than once a month without inconvenience and it cannot therefore be allowed.

R. VIJAYINDRA RAO,
Secretary.

To—Messrs. Davy, Muddappa & Co., Abkari Contractors, Mysore.
The Deputy Commissioners of Districts, for information.

No. 313.

SURVEY SUPERINTENDENT'S OFFICE,
Dated Talva, 10th May 1881.

From

*The Superintendent, Revenue Survey and Assessment,
Mysore.*

To

*The Secretary to the Dewan to His Highness
the Maha Raja of Mysore.*

SIR,

I have the honor to forward the marginally noted papers on the revision of the assessment of the Kunigal Taluk of the Tumkūr District.

1. Survey Superintendent's Report No. 195, dated 16th March 1881, and its accompaniments.
2. Survey Superintendent's letter No. 196 of the 16th idem, to the Deputy Commissioner, Tumkūr District.
3. Tumkūr District Deputy Commissioner's letter No. 35 of the 4th May 1881.

2. The Deputy Commissioner, it will be observed, considers the proposed rates to be intrinsically moderate. Such being the case it is unnecessary for me to go any further into the remaining prominent features of the proposed settlement, such as the disclosure by Survey of an unduly large occupied area, the inequality of the old assessment and the general inaccuracy of the accounts, which have been fully dealt with. Like myself the Deputy Commissioner apprehends a large resignation of lands at the settlement. In short, excepting as regards the effect of the batayi system upon the past collections, on which I must let our respective views stand for what they are worth, there is no difference of opinion. Whatever the reason the decrease of revenue during the late years has been very serious as shown in para 22 of my report.

3. There is but one point upon which sufficient stress has not been laid by either the Deputy Commissioner or myself and that is the ruinous condition of a large number of the tanks. Here we have a very intelligible reason for the decrease in the revenue. It is impossible to exaggerate the importance of renovating these works, when out of repair, and maintaining them efficiently.

4. I beg that sanction to the proposed revision of the assessment may be granted as soon as possible as I trust to be able to give out the rates by the 15th instant.

I have the honor to be

Sir,

Your most obedient Servant,

J. P. GRANT,

Supt., Revenue Survey and Assessment, Mysore.

No. 195.

SURVEY SUPERINTENDENT'S OFFICE,
Dated Tunkūr, 16th March 1881.

From

The Superintendent, Mysore Revenue Survey.

To

The Survey and Settlement Commissioner of Mysore.

Sir,

I have the honor to submit the following proposals for the revision of the assessment of the Government villages of the Kunigal Taluk of the Tunkūr District.

Introductory.

2. Appended will be found a report and notes on the taluk by the various officers in charge of classing operations, as also letter No. 202 of the 6th September last, from the Deputy Commissioner containing information regarding the old rates of assessment and the past revenue management generally. A map, in illustration of the present report, is also attached.

3. The Taluk of Kunigal has the following maganis or ancient sub-divisions :—

Ancient Sub-Divisions.

No.	Name of Magani.	Government Villages.	Inam Villages.	Kavals.	Total.	Remarks.
1	2	3	4	5	6	7
1	Kunigal	25	3	...	28	
2	Yedhyur	64	5	3	72	
3	Kottagera	33	8	1	42	
4	Huliyurdurga	43	11	...	54	
5	Kopra	26	2	...	28	
6	Amrutur	54	12	...	66	
7	Hutridurga	31	6	...	37	
8	Byadarhalli	28	1	...	29	
	Total.....	314	48	4	366	

4. The inam villages are not dealt with in the present report.

Inam villages exempted from the settlement.

5. Kunigal is a comparatively level and open taluk, excepting towards the west and south-west where the Huliyurdurga and Byadarhalli Maganis, as well as a portion of the Hutridurga Magani, are occupied by a continuation of the great hill range which, entering Mysore near Midgesi in the Maddagiri Taluk, runs south through Maddagiri, Koratagera and Devaraydurga and, in the Taluk under report, is represented by the heights of Hutridurga and Huliyurdurga. In these more wooded and hilly tracts the soils are poor and stony, while tanks and irrigation generally are less common than elsewhere, but in the valleys and bottoms there is much moisture and altogether the country, although somewhat inaccessible, is not quite so barren as might at first sight be supposed from its appearance. In the centre, near Kunigal itself, and to the west and north generally of the hills just described, between them and the Shimshi river, the country opens out and chains of tanks and long stretches of irrigated land thickly occupy the surface, while there is some improvement in the quality of the soil which however in no place attains the character of what is usually known as "Reghar" or black soil.

6. The climate is not, on the whole, remarkable for its certainty. Putting aside the exceptional years of the famine there is no doubt that the country occasionally suffers from the vicissitudes of climate. During the famine Kunigal is known to have suffered intensely. The rain-fall is estimated at about 30 inches and, as might naturally be supposed, is a little heavier in the neighbourhood of the hills than elsewhere.

Climate and rain-fall.

7. In the dry lands are raised the dry grains common all over the District, ragi and beans, being the staple crop. In the wet lands rice is grown, with a fair proportion of sugar-cane under the larger and better tanks. Much diversity of practice exists with reference to raising sugar-cane, many tanks possessing an ample supply of water having no cane under them, while under other tanks, with apparently no superior advantages of either water or soil, the cultivation of sugar-cane has taken fast hold. We may expect to see a considerable extension of this cultivation after the introduction of the settlement. In the garden lands cocoa and betel-nut are grown under the larger irrigation works. Coconut and rice mixed cultivation is very common and appears to thrive. The gardens vary greatly in quality, ranging from well stocked betel and coconut to poor and almost deserted gardens. The water supply, on the whole, is good, but the tanks are described by the classing officers as standing greatly in need of repairs.

8. Captain Price states that mulberry cultivation is reviving, but on this point I do not feel at all certain. These mulberry gardens, although no doubt existing, are in a very neglected state, and Mr. Butcher (see notes on the Amratur and Yediyur Maganis) observes that its cultivation is quite given up. Probably both the above statements go a little too far. There is no doubt the mulberry is cultivated, that is to say a considerable area is returned as under that cultivation, but there are no visible signs that the silk trade is reviving. Its decadence, it will be observed from the Deputy Commissioner's letter, has necessitated a reduction of rates and in some cases a return to dry rates. The same officer states that mulberry cultivation has nearly ceased to exist. Certainly it appears to me that mulberry cultivation can no longer be regarded as exceptionally remunerative as would appear to have been the case, to judge from the rates quoted by the Deputy Commissioner at para 2.

9. As regards means of communication the Taluk is fairly well off. The northern villages have the imperial road from Bangalore to Hassan running through their midst in a generally accessible country. In the southern villages the advantages in respect of roads are more prospective than at present existing. The completion of the Mysore State Railway from Bangalore to Mysore is likely to give a direction to trade very different to that now existing and we may fairly presume that the Tumkūr-Maddur road will hereafter acquire importance. At present however it is described as a fair weather road only. The projected road from Haliyurdurga to Magadi appears to have been a failure. The effect of the new line of railway, it can scarcely be doubted, must be to improve the position of the taluk generally, but it will bring the southern villages more on terms of equality with those to the north than is the case at present, the latter being decidedly better situated with reference to trade and means of communication generally, than the former.

10. Markets are held at various points throughout the Taluk, the most important being that at Kunigal itself; others of local interest are held at Hutridurga, Koppa, Nagasandra and Nidsale. A large fair is held annually at Yediyur, but although well attended little business is done. Many of the ryots are said to carry their produce to the Bangalore market themselves instead of disposing of it at the local markets or to traders.

11. The following statement compiled from the classification papers will serve to convey some idea of the resources of the Taluk:—

Villages.	Houses.	Population.	Square Miles.	Cattle.	Carts.	Ploughs.	Markets.	Remarks.
1	2	3	4	5	6	7	8	9
314	9,888	40,364	362	89,270	756	7,457	5	

The population before the famine, deducting that of 48 inam villages with which this report does not deal, was about 73,000 against 40,364 recorded by the classers. In the report on the famine in Mysore the result of the test-census taken in 1878 showed for the whole Taluk, Government and inam villages, a decrease from 85,661 in 1871 to 48,973 in 1878. This estimate tallies pretty fairly with the classification census, allowance being made for the 48 inam villages above mentioned.

The classification figures, which represent more strictly the resident population, give, on the whole area, 112 souls to the square mile; on the culturable area 185 and on the occupied or cultivated area 286 to the square mile. Cattle are fairly numerous, considering the losses believed to have been sustained in the Taluk during the famine.

12. The next statement which it will be necessary to view at the same time as that given in the preceding para, shows how the Taluk has been divided up by the Survey :—

Description.	Government.		Inam.		Total.		Grand Total, Government and Inam.
	Occupied area.	Waste area.	Occupied area.	Waste area.	Occupied area.	Waste area.	
1	2	3	4	5	6	7	8
Garden	3,368	462	120	...	3,486	462	3,948
Rice	5,488	3,835	1,502	...	6,990	3,835	10,825
Dry crop	81,052	45,537	8,620	...	89,688	45,537	1,35,225
Total...	89,906	49,834	10,258	...	1,00,164	49,834	1,49,998
Unculturable Area including roads, village sites, &c.	...	...	...	...	...	...	82,220
Total Area of 4 Amrut Mahal Kavals	...	...	...	...	...	...	5,458
Total Area of 48 Inam Villages	...	...	...	...	...	...	37,776
Gross Area of the whole Taluk, i. e. about 430 square miles	...	...	...	...	...	...	2,75,452

13. We gather from the two above statements that there are 89,270 head of cattle and only 7,457 ploughs to 89,906 acres of cultivation. The cattle are more numerous than might be expected and in the number must be included a great many inferior animals, for only 14,488 are returned as plough cattle. A great extent of land is stated by Captain Price and others to have been thrown out of cultivation, as a result of the famine, and the collections, as I shall presently show, quite bear out that statement; but still, viewed in the abstract, the area now recorded as occupied is by no means very small. I have no doubt that the cultivating power of the Taluk has been, for the time, greatly impaired and that the area now pointed out as occupied is not fully cultivated. The result of such a state of things will be considerable resignation of land at the settlement. I shall have more to remark on this point when I come to the subject of rates. There are no less than 49,834 acres of waste arable land, of which 4,297 acres are garden and rice land. Looking at the condition of the ryots generally I think that their circumstances compare fairly well with those of average plain taluks and that, severely as the famine has been felt, the country possesses considerable recuperative power the evidences of which are very clearly visible in the crops of the year and the improved condition of the people and their cattle. All the classing officers employed in this Taluk agree however in describing the majority of the ryots as poor. The truth is, I imagine, that these officers saw, and judged from, the traces of the famine in the depopulation of the smaller villages and the abandonment of their lands. It is very common for the people to flock to the larger villages in seasons of distress. The ryots of the larger villages such as Kasba Kunigal and others where wet cultivation prevailed seemed to me to be decidedly well off.

14. The present rates of assessment are stated by the Deputy Commissioner to be low and a fear is expressed that much inequality in their incidence will be disclosed by the survey and that the extent of occupied land will be found to be very much understated in the accounts. Before proceeding to discuss these points it will be advisable to ascertain, on the basis of the newly ascertained survey area, what average rate

has actually been paid on each description of cultivation, garden, rice and dry crop. This is shown in the following statement :—

Description of Land.					Acres by Survey.	Collections of 1879—80.	Average Rate.
1					2	3	4
Garden	...	...	...	...	3,866	11,283	3 5 8
Rice	...	...	...	...	5,488	18,048	3 4 7
Dry crop	...	...	...	...	81,052	41,926	0 8 3

15. The distinction into rice and garden lands in the old accounts is so imperfect that the two may be looked at together. It will be seen that the average rate has been almost exactly the same in both cases, viz. Rs. 3—5—8 and Rs. 3—4—7.

16. It is not easy to trace back the present nominal rates to their origin, nor would it serve any practical purpose to do so. The rates stated to be now in existence, as given by Captain Price, show wide extremes ranging, in the case of garden land, from about Rs. 1—8—0 to 9—8—0 per acre ; in the case of rice land from Rs. 3 to Rs. 24, and in the case of dry land from Rs. 0—3—6 to Rs. 3—3—0. Captain Price states, in para 12, that the rates on rice land were fixed by dividing the average value (under the batayi system I presume) of the crop in 10 years by the average area under cultivation in the same years. He states in the same para that an extra levy was made in the event of sugar-cane being grown. The above with the addition that the decay of the mulberry gardens necessitated a return in some cases to the dry rate, represents all that Captain Price has to say on the question of rates. Mr. Butcher in his notes para 7, observes that the batayi tenure was converted into nagadi in 1870 in the Amrutur and Yediyur Maganis. I find that the conversion in question really took place in 1865—66, the amount collected in that year under batayi being Rs. 16,768 and in 1866—67 only Rs. 3,896.

17. This conversion of the batayi into nagadi represents a new point of departure in the revenue management of the Taluk. The operation is one which, with the best intentions on the part of those carrying it out, must, in the absence of any survey, have afforded countless opportunities for fraud. The collections, as I shall presently show, bear ample proof of the failure of the operation. The enhancement of rates in 1836 and in 1848, alluded to by the Deputy Commissioner in para 2, I look upon as of minor importance, as the enhancement in question was only partial. Rs. 0—9—4 is stated to have been fixed, and no doubt it was considered a very fair and reasonable average, as the general rate per dry Wokla of 3,200 square yards for new lands taken up after 1855—56. This would be about 12 annas per acre.

18. On comparing nominal rates with the average rates given in para 14 the fallacy of the former is at once obvious. An actual average rate of Rs. 3—5—8 for wet land, including both garden and rice, will admit of very considerable enhancement, while the average rate of only Rs. 0—8—3 for dry crop land is far below what was considered fair in the Taluk, as shown in the last para.

19. The next point is the probability of the occupied extent having been understated in the old accounts. I find that in 1879—80 there were recorded as occupied 3,641 khandis of dry land and 2,519 khandis of wet land which, converted into acres, would give the following results as compared with the Survey area :—

Description.					Acres occupied according to old accounts.	Acres occupied according to Survey.
1					2	3
Dry	...	...	...	...	48,144	81,052
Wet	...	...	...	...	5,204	8,854
Total.....					53,348	89,906

The excess found by survey is great compared even with what we usually find in Mysore, and there is ample room to conclude that the occupied area has been greatly understated in the old accounts.

20. The collections for the last 25 years are shown in the following statement :—
at Collections.

Year.	Bijvari Khandis.	Demand.	Remissions.	Collections.
1	2	3	4	5
1855—56	5,595	72,123	...	72,123
1856—57	5,950	80,136	...	80,136
1857—58	5,861	78,711	...	78,711
1858—59	5,675	81,317	...	81,317
1859—60	6,593	98,661	...	98,661
1860—61	6,881	95,894	...	95,594
1861—62	6,481	88,236	...	88,236
1862—63	7,058	95,659	...	95,659
1863—64	6,720	88,346	...	88,346
1864—65	6,476	85,863	...	85,863
1865—66	7,684	96,778	...	96,778
1866—67	6,568	80,891	...	80,891
1867—68	7,074	98,151	...	98,151
1868—69	6,920	91,299	...	91,299
1869—70	5,746	85,355	8,803	84,552
1870—71	6,881	81,269	...	81,269
1871—72	7,517	80,586	...	80,586
1872—73	7,003	78,612	...	78,612
1873—74	6,869	77,085	...	77,085
1874—75	7,341	83,378	...	83,378
1875—76	7,228	81,381	...	81,381
1876—77	7,196	80,541	7,508	73,033
1877—78	6,918	76,369	...	76,369
1878—79	6,476	74,526	...	74,526
1879—80	6,200	71,257	...	71,257
Five years' average	...	...	...	75,301
Ten years' average	...	...	...	77,743
Twenty years' average	...	...	...	83,905
Twenty-five years' average	...	...	...	83,562

21. I have already given my reasons for distrusting the bijvari shown in column 2. Remissions, with one exception, have not been given excepting during the famine. In 1869—70 a sum of Rs. 3,803 was remitted. The jamabandi accounts in Mysore are however not calculated to show, on their face, the actual remissions, the demand being often fixed after, instead of before, the annual examination of accounts. Looking at the collections alone, apart from remissions, the revenue history of the taluk, is a curious and by no means a satisfactory one. There has been a general and steady falling off since 1866 which, excepting 1859—60 when the collections actually reached Rs. 98,661, is the year of the highest collections on record. It was in 1866—67 that "Batayi" or grain rates began to be superseded by "Nagadi" or money assessment. Before that time the batayi realizations had been still heavier; for instance in 1859—60 the amount realized under batayi was Rs. 35,415, in 1865—66 it was Rs. 16,766 and in 1879—80 it was only Rs. 446.

22. Thus in 1879—80 we have the following figures, as compared with 1859—60 and 1865—66, which will show how great has been the decline of the revenue :—

Year.	Nagadi Rs.	Batayi Rs.	Total Rs.
1	2	3	4
1859—60	63,246	35,415	98,661
1865—66	80,012	16,766	96,778
1879—80	70,811	446	71,257

How far 1879—80 was an exceptional year the statement at para 20 will show. The decline of the revenue began long before the famine set in and I cannot but conclude that the conversion of batayi into nagadi has been the main cause of decrease. It was right on principle to substitute money assessment for the payment in grain, but the operation was a failure in the absence of any survey.

23. A price list for the chief products of the country is subjoined :—
Prices.

Year.	Seers for one Rupee.		Remarks.
	Rice.	Ragi.	
1	2	3	4
1856—57	20	44	
1857—58	16	46	
1858—59	11	25	
1859—60	...	...	
1860—61	11	29	
1861—62	11	28	
1862—63	12	33	
1863—64	...	...	
1864—65	8	33	
1865—66	...	...	
1866—67	8	17	
1867—68	8	17	
1868—69	9	30	
1869—70	10	20	
1870—71	...	...	
1871—72	12	71	
1872—73	12	64	
1873—74	12	53	
1874—75	11	40	
1875—76	11	26	
1876—77	7	12	
1877—78	6	10	
1878—79	6	9	
1879—80	10	30	

24. The data for some of the years are not procurable, but the general fluctuation of prices is made apparent. Ragi, last year, was at very much the same quotation as in 1860 when such high collections were made. I cannot but assign the unsatisfactory state of the revenue, as shown in results, to the unequal distribution of the assessment now to be superseded. That the collections should be kept up to the high pitch to which they were forced under the batayi system was not to be expected, but when, in 1866—67, money assessment became almost universal it was I think to be expected that a more stable and healthy state of things should follow.

25. However moderate the new assessment may be it will tell with unequal, and perhaps on that account undesirable, effect upon the old assessment, but the extreme moderation of the new rates robs the latter suggestion of any force. Cultivation or occupancy will to a certain extent, so to speak, re-adjust itself under the new system and a very much more healthy condition of things set in.

26. For the purpose of assessing these villages, I propose to divide them into 3 groups or classes as shown below, with the maximum rates for dry crop, rice and garden as indicated opposite each :—

Group.	Number of Villages.	Maximum dry crop rate.	Maximum rice rate.	Maximum garden rate.	
				Tank.	Well.
1	2	3	4	5	6
I	40	2 0 0	8 0 0	} 16 0 0	6 0 0
II	71	1 12 0	7 0 0		
III	203	1 8 0	7 0 0		

The first group is round Kunigal itself, and in every way well situated as regards both roads and markets.

The second group is round the first, but a little more distant from markets and roads.

The third group represents the bulk of the Taluk.

The maximum rates proposed are quite in accordance with those sanctioned for the adjoining settled Taluk of Magadi, than which they are on the whole a little lower.

27. The imposition of the above rates gives the following estimated assessment of the occupied lands.
Result of the proposed rates on lands :—

Group.	No. of Villages.	Garden.			Rice.			Dry Crop.			Total.		
		Acres.	Assessment.	Average rate.	Acres.	Assessment.	Average rate.	Acres.	Assessment.	Average rate.	Acres.	Assessment.	Average rate.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
I	40	935	6,609 7	1 1	1,764	8,772 4	15 7	8,101	7,498 0	14 8	10,800	22,819 2	1 9
II	71	803	3,055 8	12 2	1,109	3,659 3	4 9	22,613	17,870 0	12 10	24,525	24,584 1	0 0
III	203	1,628	6,967 4	4 5	2,615	9,535 3	10 4	50,836	33,289 0	10 7	54,581	49,791 0	14 7
3	314	3,366	16,631 4	15 1	5,488	21,966 4	0 0	81,052	58,597 0	11 7	89,906	97,194 1	1 4

Of the 3,366 acres recorded above as garden the following detail is furnished :—

Description of Garden.		Acres.	Assessment.	Average Rate.
1	2	3	4	5
Tank ...	...	1,788	11,801	6 9 10
Well ...	...	1,555	4,755	3 0 11
Dry Coconut ...	...	28	75	2 10 10
Total.....		3,366	16,631	4 15 1

The above rates are, it will be observed, intrinsically moderate and very much lower than the existing rates of assessment. The same remark applies to the rice and dry crop lands.

28. There is the following extent of waste arable land available for cultivation :—

Result of proposed rates on waste lands.

Group.	No. of Villages.	Garden.			Rice.			Dry Crop.			Total.		
		Acres.	Assessment.	Average rate.	Acres.	Assessment.	Average rate.	Acres.	Assessment.	Average rate.	Acres.	Assessment.	Average rate.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
I	40	23	83 3	9 9	706	3,233 4	9 3	2,627	2,102 0	12 10	3,356	5,418	1 9 10
II	71	57	169 2	15 5	313	1,117 3	9 1	7,639	5,147 0	10 9	8,609	6,433	0 12 10
III	203	382	1,313 3	7 0	2,816	10,357 9	10 10	35,271	18,839 0	8 7	38,469	30,509	0 12 8
3	314	462	1,565 3	6 2	3,835	14,707 3	10 9	45,537	26,068 0	9 10	49,834	42,360	0 13 7

These waste lands are very extensive and include a somewhat unusual proportion of garden and rice lands.

29. The next statement shows the area and assessment of the minor inams included in the villages under report :—

Result of proposed rates on minor inam lands.

Group.	No. of Villages.	Garden.			Rice.			Dry Crop.			Total.		
		Acres.	Assessment.	Average rate.	Acres.	Assessment.	Average rate.	Acres.	Assessment.	Average rate.	Acres.	Assessment.	Average rate.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
I.	40	25	160 6	6 5	246	1,200 4	13 11	931	846 0	14 6	1,202	2,206	1 13 4

30. The area and assessment of the whole of the Government land, occupied and waste, and of the inam lands, is shown below in juxtaposition with the collections of 1879—80 :—

Area and assessment of the whole of the Government and of the minor inam lands in juxtaposition with the past collections.

Group.	No. of Villages.	Old.		Government, occupied.		Government, waste.		Inam.		Total.	
		Bijvari.	Collections, 1879—80.	Acres.	Assessment.	Acres.	Assessment.	Acres.	Assessment.	Acres.	Assessment.
1	2	3	4	5	6	7	8	9	10	11	12
I	40	1,369	16,142	10,600	19,819	3,356	5,418	1,202	2,206	15,358	27,443
II	71	1,455	17,557	24,523	24,584	8,009	6,433	2,239	2,263	34,773	33,280
III	203	3,976	37,558	54,581	49,791	38,469	30,509	6,819	8,314	99,869	88,614
3	314	6,200	71,257	89,906	97,194	49,834	42,360	10,260	12,783	150,000	1,52,337

31. The one anna local cess brought in, in 1879—80, a sum of Rs. 4,836 ; under the proposed settlement the amount realizable will amount to Rs. 6,075 on the Government occupied land and Rs. 799 on the minor inam lands, in all Rs. 6,874.

Local Cess.

32. The realizations from the sale of grazing amounted in 1879—80 to Rs. 2,969 : under the proposed settlement the amount realizable will probably be more, but there is no certainty on this point and I will therefore estimate probable realizations at the same figure as last year.

Grazing.

33. The estimated results of the proposed settlement show as below against the collections of 1879—80. Grazing is omitted in both cases :—

Result of the proposed settlement.

	Rs.
Collections of 1879—80	71,257
One anna local cess	4,836
Total under old system...	76,093
Survey assessment of occupied lands	97,194
One anna local cess	6,874
Total under new or survey system...	1,04,068

34. The gross gain, leaving out any calculation of local cesses, is Rs. 25,937. From this sum however, to arrive at the net gain to Government, must be deducted the following items.

Gross gain to Government.

35. The pay of village officers will amount in round numbers to Rs. 6,000.

Pay of Village Officers.

36. The annual contribution to the irrigation fund from the ordinary wet assessment will amount to a sum of Rs. 2,270.

Irrigation Fund.

37. The sum of the amounts shown in the two preceding paras comes to Rs. 8,270, leaving a net gain to Government of Rs. 17,667.

Net gain to Government.

38. Before proceeding to show to what extent this gain of Rs. 17,667 is likely to be reduced at the settlement by resignations, I will show what the effect of my proposals is, with reference to other years than 1879—80, in which it will be observed the collections were exceptionally low, in fact the lowest during the last 25 years. The proposed assessment of the occupied lands is Rs. 97,194.

Exceeding the collections of 1879—80 by	..	Rs. 25,937
" the average of the last 5 years by	..	21,893
" " 10 " "	..	19,451
" " 20 " "	..	13,289

In 1866, the collections rose to Rs. 96,778, almost the same as the assessment now proposed. It must not be lost sight of that according to the old accounts, the area under cultivation has increased year by year, while the collections have been decreasing.

39. The occupied area now ascertained by survey greatly exceeds, as I have already shown in para 19, the supposed area, and there can be no reasonable doubt that a great deal of land not actually covered by the ryots' pattas as been pointed out as occupied. We must therefore be prepared for a good many resignations of land at the settlement. It would be unreasonable to expect any other result in the present reduced state of the country. Whatever rates we may now adopt the people will not be tempted to retain in their holdings more land than they actually require for cultivation. I think, however, that enough will be retained to make the proposed settlement immediately advantageous to Government with very good prospects in the future.

40. I have shown that the average rates, for all descriptions of land, resulting from my proposals, are very much lower than those current under the old system, and also that they are intrinsically low and quite in accordance with rates already sanctioned and working successfully in neighbouring taluks. More than this cannot be done for a taluk in which the old assessment has been so unequal and generally corrupt as that now under report. As the cultivating power of the country increases, as it now fairly promises to do, the survey rates will not be found at all prohibitive and I think a very few years will witness considerable extension of cultivation.

41. The usual classvar statement showing assessment, area, population and other particulars village by village is appended, as also a list of inam villages and the method of survey which has been applied to each.

42. I beg that sanction may be obtained as soon as practicable to the proposed settlement. I hope to be able to commence giving out the rates by the 1st of June next at the latest.

Date of the commencement of the proposed settlement.

I have the honor to be

Sir,

Your most obedient Servant,

J. P. GRANT,

Superintendent, Revenue Survey
and Assessment, Mysore.

APPENDIX B.

List showing the whole Inam Villages in the Kunigal Taluk of the
Tumkūr District.

No.	Name of Villages.	Description of Inam.	Nature of the Survey applied.

J. P. GRANT,
Superintendent, Mysore Revenue Survey.

Dated Bangalore, 30th August 1880.

No. 50.

*From**The Assistant Superintendent,**Mysore Revenue Survey.**To**The Officiating Deputy Superintendent,**Mysore Revenue Survey.*

Sir,

I have the honor to submit the following report on the Kunigal Taluk, Tumkūr District, classed during the past field season by the "C" "E" and "M" Establishments.

2. The Kunigal Taluk lies in the south-east corner of the Tumkūr District, and is bounded on the north-east and east by the Magadi Taluk; on the south-east by the Closepet Taluk, both belonging to the Bangalore District; on the south by the Maddur and Mandya Taluks of the Mysore District; on the west by the Nagamangala Taluk of the Hassan District; and on the north and north-west by the Kadaba Taluk of the Tumkūr District. Kunigal, the taluk head-quarter town, is situated at the junction of the Bangalore-Hassan and Tumkūr-Maddur roads; it is about 44 miles west of Bangalore, and about 22 miles south of Tumkūr.

3. The taluk is about 26 miles, north and south, by about 16 miles, east and west. The "Hoblis" in the north-west and south-west contain an undulating tract of country, intersected by deep ravines, small tanks being numerous. The Kunigal "Hobli" lies in a valley in which large tanks are numerous, owing to which wet cultivation, both rice and garden, is extensively carried on. The hobli to the east, (Hutridurga) is hilly; while those in the south-east, (Byadarahalli and Huli-yurdurga) are hilly and jungly, the ground being rocky and barren. A continuation of the Savandurga range of hills, so prominent in the Magadi Taluk of the Bangalore District, runs through the south-east of the taluk, the highest peaks being Hutridurga and Huli-yurdurga 3,086 feet high; these hills have extensive fortifications surrounding them, commanding all approaches; these fortifications were erected by Kempe Gauda, the chief of Magadi. The fort of Hutridurga was taken by Lord Cornwallis in the year 1792.

4. The area of the taluk is about 328 square miles. Its population before the famine of 1876-77 was estimated at 85,661; at present, however, I think it may fairly be taken at about 55,000. The taluk suffered very much during that trying period from death and emigration.

5. The taluk is at present divided into 8 "Hoblis" or "Samnats," namely:—

- | | |
|------------------|-------------------|
| 1. Kottagere. | 6. Huli-yurdurga. |
| 2. Kunigal. | 6. Koppa. |
| 3. Hutridurga. | 7. Amrutur. |
| 4. Byadarahalli. | 8. Yediyur. |

These "Hoblis" contain 366 villages which include 313 Government villages.

- | |
|------------------------|
| 39 Jodi inam villages. |
| 7 Sarva inam villages. |
| 4 Kayangutta villages. |
| 3 Amrut Mahal Kavals. |

6. The most common soil to be met with is red, with a fair mixture of sand. In the Kunigal "Hobli," especially in low-lying situations, the soil is of a somewhat superior quality, while that in the Hutridurga, Byadarahalli and Huli-yurdurga "Hoblis" is very poor and much intermixed with gravel and stone.

7. A continuation of the Savandurga range of hills extends to the eastern portion of the taluk; entering the taluk in the vicinity of Hutridurga, the range passes through the Byadarahalli and Huli-yurdurga hoblis, and leaves it at the boundary of the Bangalore and Mysore Districts.

8. The imperial road from Bangalore to Hassan passes through the taluk ; entering it 5 miles to the east of Kunigal, it leaves it again at Yediyur about 12 miles to the west of it. A good deal of traffic goes along the road, especially to and from Hassan, Manjarabad, and the southern parts of Mûdgere, and Chikmagalur. The Tumkûr-Maddur road, (a District one) enters the taluk about 7 miles to the north, and leaves it about 19 miles to the south of Kunigal. This road is good fair-weather road, but is not available for heavy traffic in the rains. Another road enters the taluk from the east, near the village of Byadarahalli. It was originally intended that this road should supply direct communication between Magadi and Huliurdurga, but owing to much difficulty being experienced in cutting the road across the hills lying between Byadarahalli and Huliurdurga it was abandoned. To within 5 miles of Huliurdurga it is now used for cart-traffic, but beyond that distance it is quite impassable for carts.

9. The Shimsha, an affluent of the Cauvery, after flowing in a south-westerly direction through the Kadaba Taluk, runs along the western boundary of the Yediyur hobli, it then enters the Amrutur "hobli" and taking an easterly course, it flows along the mutual boundary of the Amrutur and Koppa "hoblis" ; skirting the hills to the west of Huliurdurga, it pursues a southerly course, and enters the Maddur Taluk of the Mysore District. There are a few minor streams in the taluk, the most important of which is the Nagini ; this stream is caused by the drainage of the Kunigal, Kottagere, Nilathalli, and other minor tanks in the north-east of the taluk ; it flows in a south-westerly direction from the Kunigal tank, passes through the Amrutur hobli, and finally empties itself into the Shimsha.

10. Some of the largest tanks in the Tumkûr District are to be found in this taluk. The tank at Kunigal is supposed to be the very largest ; when full it is about 14 miles in circumference, and has an area of 704 acres. The following are some of the most important tanks in the Taluk :—

					Acres.
Dipambudhi Tank	...	...	...	...	478
Kottagere "	...	...	...	...	321
Yeliyur "	...	...	...	...	154
Begur "	...	...	...	...	193
Nilathalli "	...	...	...	...	143
Kittagmangala,	...	...	...	...	213
Hoddegatta "	...	...	...	...	99

The Dipambudhi tank is the deepest in the taluk and has a very large storage of water ; the Shanbhog informed me that the water immediately behind the sluice on the day that I tested the lands below the tank, was 50 feet deep, and the tank at the time was about half full. Unfortunately the channels conducting the water to the irrigated lands are very much out of repair, and the lands are all lying waste. Other minor tanks abound in the taluk. The mode of irrigating the lands is chiefly by channels from the various tanks, the main channels leading from the larger tanks are built of masonry, while those from the smaller ones are, for the most part, ditches cut by the villagers, and kept up at their expense. Wells in favorable positions are also used for supplying irrigated lands with water, the means employed for raising the water being by "Yatam." The drainage in the north of the taluk is from the north-east, and east towards the west ; this is no doubt due to the hilly country lying in the direction of Shivaganga in the Nelamangala Taluk. The drainage in the east is in a westerly direction, caused by the hills in the direction of Hatriiduga, Huliurdurga, and Byadarahalli. The drainage in the west and south is in a southerly direction as indicated by the course of the river Shimsha.

11. The marginally noted dry crops are raised in the taluk. Ragi is the staple food of the ryots, hence it is extensively cultivated in the unirrigated lands ; the plan adopted being, to sow it in the same field with "Avare" (*dolichos lablab*) togari (*cojanus indicus*) and hutchella (*guizotea oleifera*). Ragi is first sown in rows at convenient distances, and then the other seeds, after being mixed together, are sown in rows between the rows of ragi. Hurali (*dolichos uniflorus*) is sown in newly ploughed lands, and requires but little attention ; after it is sown, it is generally left to itself.

The chief crop grown on irrigated lands is rice ; some of the different varieties raised are marginally noted. Sugar-cane is also grown under the larger tanks, and the manufacture of jaggery is found to be very paying ; it does not appear to be customary to take a double crop off rice lands in the same year, but I have observed that "Kartik" and "Vaisak" crops are taken off lands below the same tank, but not in the same year ; for instance, below the Begur tank, at the time of test, I found that the early crop of rice was being reaped in the lands immediately below the embankment, but a little more remote from it, land, which during the rains had been lying waste, was being prepared for a hot weather crop ; on enquiry I was informed that it was not the custom in the taluk to take two crops of rice off the same land in the year, but that land which was not cultivated in the early part of the season was always, where the water-supply admitted it, sown with a view of taking

a hot weather crop off it. Below the Kottagere tank at the the time of test, I found almost all the rice lands lying waste ; on going there however later on in the season (July) I found a fine hot weather crop standing. The marginally noted varieties of sugar-cane are grown in the taluk and require from 10 to 18 months to come to perfection. Sugar-cane was grown under the following tanks during the past five years :—

1. Kunigal tank.
2. Begur tank.
3. Herur-Kanchagalpur tank.
4. Kitnagmangala tank.
5. Kottagere tank.
6. Nilathalli tank.
7. Dipambudhi tank.
8. Haliyur tank.
9. Yeliyur tank.
10. Buksagara tank.
11. Somdalgere tank.

The principal garden crops in the taluk are marginally noted. All the larger tanks have cocoanut and arecanut gardens below them, generally speaking in poor condition. In some cases I found rice growing below the trees, much to the detriment of the latter, from which I conclude that rice pays better than garden cultivation in this taluk. The gardens below the Kunigal, Kottagere and Herur-Kanchagalpur tanks were, however, much superior to those below the other minor tanks. The cultivation of the mulberry was at one time, about 15 or 20 years ago, very popular in the taluk, but the production of raw silk has much declined owing to continued

mortality of the worms, hence garden cultivation of this nature is not so popular as it was. On inquiry I found it was reviving again and in the marginally noted "hoblis" mulberry gardens are frequently to be met with. Mulberry gardens are generally found in low lying situations where the soil retains a fair amount of moisture. Sometimes gardens of this kind are watered by yatom from wells. The other garden crops are very sparingly cultivated and are irrigated from wells.

Cocoanut.
Areca-nut.
Betel vine (pán)
Mulberry.
Ground-out.
Coriander.
Garlic.
Fenugreek.
Sweet potatoes.
Native vegetables.

12. The rates for dry crop lands vary in the different "hoblis" of the taluk from 1 anna, 2 pies to Rs. 3 per kolaga of 500 square yards. The following statement shows what they are, in each of the different hoblis that came under my personal notice :—

Rates.

Kottagere, from	2 annas,	4 pies to	Rs. 2 annas 5 and pies 3.
Kunigal	" 2 "	4 "	" 1 " 12.
Hutridurga	" 1 "	2 "	" 3 " 1.
Byadarahalli	" 2 "	4 "	" 2 " 5 and pies 3.
Huliurdurga	" 2 "	4 "	" 2 " 5 " 3.

In the irrigated lands the rates are very variable and depend to some extent on the kind of crops grown. The following statement will show what they are per kolaga of 500 square yards in rice and garden lands in the hoblis classed by the "M" Establishment. In rice lands they are—

Kottagere, from	4 annas,	8 pies to	Rs. 2 annas 5 pies 3.
Kunigal	" 4 "	8 do	0 " 12.
Hutridurga	" 4 "	8 do	0 " 12.
Byadarahalli	" 4 "	8 do	2 " 5 pies 3.
Huliurdurga	" 2 "	4 do	2 " 5 " 3.

In garden lands the rates are as follows :—

Kottagere, from	2 annas,	4 pies to	Re. 1.
Kunigal	" 2 "	4 do	annas 14.
Hutridurga	" 2 "	4 do	1.
Byadarahalli	" 2 "	4 do	1.
Huliurdurga	" 2 "	4 do	1.

From the above statements the rates in the Kunigal "Hobli" appear to be lower than those in any of the other "hoblis;" this is strange, as the hobli is far superior to any of the others with regard to water supply, position, soil, and condition of its inhabitants, most of whom are Brahmans. The rates in the irrigated rice lands below tanks were originally fixed by dividing the average value of the crop in ten years by the average area under cultivation during the same period. In lands under the larger tanks where rice and sugar-cane are grown, I observed that in years when a rice crop was raised, the fixed "kandayam" was paid, but in the event of a sugar-cane crop being raised, an extra levy was made. If the sugar-cane crop took over the year to come to maturity, the extra levy was only made in the first year, the fixed kandayam being paid the second year. In garden

lands where mulberry was formerly grown but where, owing to the failure of silk farming a dry crop is now raised, I observed that the "Shatút," kandyam was remitted and a "Kushki" kandyam levied. The "Batayi" system of giving lands for cultivation only prevails in rice lands not regularly cultivated and that under the larger tanks.

13. The chief exports are ragi, horse-gram (hurali) paddy and jaggory to Bangalore, Magadi and Tiptur; the imports are coconuts (dry and green), chillies, areca-nut, and cotton from Tiptur, and piece goods from Bangalore.

14. Blankets (cumbles) of an inferior quality are made in the taluk: these are the only articles of manufacture that came under my notice. The ryots are chiefly cultivators of the soil, and the poorer inhabitants get their living by cooly work, the rates of hire being 3 annas per diem for a man, and 1 anna 6 pias for a woman.

15. Markets are held weekly at Kunigal, Hutridurga, Koppa, Nagasandra (Yediur hobli) and Nidasale (Haliyurdurga hobli). The market at Kunigal is the most important of these; the others are of local interest only. A yearly fair is held during the Sadashevara "jatre" for 5 days at Yediur, about 10,000 people collect at the time, but not much trade is carried on. Eatables and a few articles of private consumption are the only things brought there for disposal.

16. A few fine cattle are to be met with in the taluk: the climate and grazing seem to be particularly favorable for them. During the past few years, however, diseases of various kinds have carried off large numbers of them. The Amildar fixes the number at present in the taluk at about 52,800. Sheep and goats seem to thrive well in the taluk, the former in the northern hoblis and the latter in the southern or more jungly ones. The Mysore Government have an important establishment for breeding horses for the Mysore Siledars at Kunigal, which appears to be in a flourishing condition. The Yediur hobli appears to be the most favorable one for cattle generally.

17. The system of sub-letting is chiefly adopted in the larger towns where Brahmans are numerous, and also in inam lands. The different modes are as follows:—

1. "Vara." The pattadar paying the kandyam takes half the produce, while the cultivator receives the other half for the trouble and expense of cultivation.
2. "Argor." The pattadar paying half the kandyam takes a quarter of the produce, while the cultivator pays the other half of the kandyam and receives three-quarters of the produce for trouble and expense.
3. "Mogome." In this case a previously fixed amount of the produce is taken by the pattadar, while the cultivator pays the kandyam and appropriates the balance of the produce. In the case of a sugar-cane crop the amount fixed on is valued, and the pattadar receives money and not produce.

The system of subletting is not general in Government lands, but is in use in inam lands.

18. Labor is chiefly obtained from the poorer classes, very little outside aid is needed. The mode of employing "Coolies" is by the day, the rates of hire being 3 annas per diem per man and 1 anna 6 pie per woman: during harvest operations it is usual to make payments in grain from the crop being reaped.

19. The Krishnaraj or Government khandi is equivalent to 160 "pakka" seers; this measurement, however, is not adopted by the ryots. In the villages bordering on the Mysore District, to which they originally belonged, the "Khandi" is equivalent to 200 "pakka" seers, but in the other villages of the taluk, the ryots and petty merchants have a khandi measurement equivalent to 240 seers; all private transactions are effected according to this measurement. The "Pakka" seer is equal in weight to Rs. 80. The khandi is equal to 20 kolagas, the Government kolaga being 8 "pakka" seers, while the ryots value it at 10 or 12 seers as explained above.

20. Useful trees are scarce in the taluk; with the exception of those in the Byadarahalli and Haliyurdurga Sammats few are to be met with. The "Hippemara" is a favorite with the ryots owing to the oil extracted from its berry being extensively used for lighting purposes. Such trees are numerous planted in the "Gund topes." The younger topes are generally speaking in a very poor condition, no doubt owing to the drought during the late famine. The different kinds of ficus the mango, tamarind, and "jaman" or nerale, together with the wood apple, bael tree, babul and bamboo are found in the cultivated lands.

21. The climate of the parts of the taluk lying in the north, east and west is generally healthy; on the other hand the hoblis of Byadarahalli and Haliyurdurga lying in the south-east and south are decidedly unhealthy, being subject to malarious fevers, owing to excessive vegetation.

22. The rain-fall of the taluk is variable ; from data received from the taluk records, it averaged 22 inches during the 4 years previous to the famine, but for the last three years, the average has been about 32 inches.

Rain-fall.

23. From what I have seen of the ryots, I believe that they, generally speaking, are in poor circumstances. In the vicinity of Kunigal however they seem to be better off. The late famine affected the taluk to a considerable extent, and much land that was under cultivation at the time of measurement (before the famine) is now lying waste through want of cultivators. I give a list of villages in Form "A," which are not so favorably situated as the others in the taluk and which are deficient in water-supply.

General Remarks.

It is not customary in the taluk for the villagers to give grain or money to Patels. Shanbhogs, however, get sums varying from 4 annas, 8 pies to 1 rupee from the ryots, and in addition make grain levies. Previous to the famine it was customary to pay "Talavars," "Totis," and "Nir-gantis," in grain ; this custom seems since the famine to be in some measure discontinued. Numerous complaints were made to me by these minor village servants about their grain "haks." In Form "B" I give a list of some of the villages in which I took notes on the subject of grain.

24. I also attach a vernacular tank register for your information.

I have the honor to be
Sir,
Your most obedient Servant,

R. L. PRICE, CAPTAIN,
*Assistant Superintendent,
Mysore Revenue Survey.*

Group of Villages referred to in para 23 of Report.

Number.	Name of Village.	Population from Classes' - Khameshamari.	Dry Crop Area.	Irrigated Area.	Total Survey Nos.	REMARKS.

19		Bedarhalli	...	...	...	...	...	Do	...	Receives Rs. 113 from villagers, also areca-nut 1 maund, Rs. 5 & 100 coconuts Rs. 2.
20	Bedarhalli.	Kundalgere	...	...	...	...	...	Do	...	Also 1 maund areca-nut Rs. 5 & 100 coconuts Rs. 2.
21		Ujari	...	...	...	...	...	Do	...	Receives only Rs. 6 in cash from villagers.
22	Hutridurga.	Yellakadkalla	...	...	...	...	...	Do	...	Receives Rs. 4 in cash.
23		Illitayara	...	...	...	...	...	Do	...	Receives Rs. 40 in cash from villagers.
24	Hutridurga.	Kenkeri	...	...	...	...	...	Do	...	Receives Rs. 6 from villagers.
25		Bommanhalli	...	...	...	...	...	Do	...	Receives Rs. 8 in cash from villagers.
26	Hutridurga.	Bairayakanzhalli	...	...	...	...	...	Do	...	No money payment.
27		Kiragur	...	...	...	...	...	Do	...	Receives Rs. 12 in cash from villagers.
28	Hutridurga.	Hallyur	...	...	...	...	...	Do	...	Receives Rs. 15 in cash from villagers.
29		Haag: Hobli	...	...	...	...	...	Do	...	Receives Rs. 16 in cash from villagers.
30	Nidale	...	...	...	...	...	...	Do	...	Receives Rs. 40 in cash, no grain levy.
		...	...	...	...	...	...	Do	...	Receives Rs. 20 nomtasi given now, when latayi is cultivated used to get about 1,600 seers of paddy.
		...	...	...	...	...	...	Do	...	States he receives Rs. 117 from villagers in cash.

The Shanbhog always enforces the money dues, but the grain levies are paid very irregularly. In most cases none have been paid since the late famine.

ROB. L. PRICE, CAPT.,
Asstt. Supt., Revenue Survey,

BANGALORE,
29th August 1880.

Notes on the Amratur and Yedayur Maganis of the Kunigal Taluk, classed by the "E" Establishment.

The maganis lie to the north-west of the taluk on the Nagamangala frontier. This tract is of an undulating character, the soils being for the most part red, in some places of good quality, in others of the grey, sandy and gravelly descriptions.

2. Tanks are numerous but nearly the whole of them are out of repair, some being silted up to a great extent, whilst in the others, the channel supplying tank with water, being out of repair, the supply of water in the tank is not sufficient to bring up a crop of cane to maturity.

3. The crops chiefly grown in dry lands are ragi and beans, togara, harka, and horse-gram. Oil-seeds are not raised to any great extent as there are a very large number of "Nim" and "Ippe" trees grown in the ryots' holding which go far towards supplying them with oil for domestic consumption.

4. In the wet lands under tanks gardens of areca, plantains, &c., are of very limited area, the best being under the Amratur Tank. All these gardens have suffered more or less from the drought during the late famine and are therefore not in a flourishing condition.

5. I saw no cane cultivation in any of the villages classed by my establishment though a good deal of cane used formerly to be grown. The cultivation of mulberry also was at one time carried on to a considerable extent, but about 12 years ago disease appeared amongst the silk-worms and although owing to the failure in the silk trade, the kandayam of all "Shatat" lands was reduced by half, the cultivation has been quite given up.

6. Rice is now the only crop met with in eastern lands, the kinds chiefly grown are dodda-bhatta, san-bhatta, and put-bhatta. Double crops of rice are not raised on this tract of country.

7. The rates for tari range from 7 to 12 As. per vakla, and under one tank it reaches 14 As. A large area of both kushki and tari lands used to be cultivated on batayi. Since 1870 most of the kushki has been converted into nagadi, but some tari cultivation is still carried on under that system.

8. About $\frac{1}{4}$ th of the lands in this portion of the taluk is sublet to shikmidars, either on "Vara" or, more commonly, on "Aragoru" in which the pattadar takes $\frac{1}{4}$ th of the crop each paying half of the assessment. A market is held at Nagasandra weekly.

E. H. BUTCHER,

Assistant Supt., Mysore Revenue Survey.

13th August 1880.

P. S.—The river Shimsha runs along the border of these two maganis, but its water is not utilized for irrigation purposes.

Notes on the Koppa Hobli of the Kunigal Taluk, Tumkár District.

The hobli lies in the very south of the taluk.

Situation.

2. North, the Amratur hobli, Kunigal Taluk; south, the Mandya Taluk, Mysore District; east, the Mandya Taluk; west the Nagamangala Taluk, Hassan District.

Boundaries.

A few villages of the Haliyurdurga hobli also touch it on the east and a few villages of Mandya also on the west. On the north and east the river Shimsha separates it from the rest of the Kunigal Taluk.

3. Slightly undulating, a few rocky hills in the south.

Physical characteristics.

4. Very poor and gravelly on the uplands; a good red loam in most of the valleys.

Soil.

5. Ragi, avara, harka, &c., on the dry crop soil; rice, plantains, and occasionally supari and sugar-cane under tanks; the latter crop is however very rarely grown.

Crops.

6. There is a first class tank at the kasha, with good gardens under it: the other tanks are very small.

Tanks.

7. Purely agricultural ; greatly reduced by famine, the majority very poor indeed.
Population.

8. No made-road exists in the hobli, which contains only five "chakra bandis."
Communications.

9. The usual dry grains ; also plantains and some areca-nut. The plantains grown under the
Exports. Koppa tank are said to be of excellent quality and fetch a high price at Mysore.

10. Manchester goods, saries, brass pots, &c.
Imports.

11. A market is held at the kasaba every Sunday.
Markets.

12. Owing to the want of communication the price of grain is very low. In May, kulthi was
Prices. selling at fifty seers per rupee, when in Bangalore at the same time it was only twenty-seven seers per rupee.

13. For rice land from Rs. 4 to Rs. 7 per acre. Garden Rs. 5 to Rs. 10. The latter rate,
Rates. however, I only found imposed on some gardens under the large Koppa tank.

In dry crop I found them paying as low as 5 annas an acre ; but as the soil was little better than pure gravel, it seemed to me a marvel how crops could be grown on it at all.

14. I did not reduce to writing any information concerning the grain dues paid to village servants in this hobli, but from enquiries I made I found them identical with those in other parts of the taluk.

W. E. A. JAMES,
Assistant Superintendent,
Mysore Revenue Survey.

Dated 10th July, 1880.

P. S.—A few cumblies and coarse cloths are woven by the holayars in a few villages.
Manufactures.

Mis. No. 202.

DEPUTY COMMISSIONER'S OFFICE,
TUMKUR DISTRICT,
Tumkur, 6th September 1880.

From The Deputy Commissioner, Tumkur District.

To The Superintendent of the Mysore Revenue Survey.

SIR,

In reply to your letter No 570, dated 29th July 1880, I have the honor to state that the prevailing rates of assessment in the present Kunigal Taluk are capable in my opinion of some enhancement. The taluk is pretty well watered and is noted for its good pasture lands. The lands under the Amritur anicut and the Koppa serial tanks are valuable, and these works which are now out of repair will soon be restored. At Huliurdurga the channels from the Devambudi tank will also soon be restored and become available for irrigation purposes.

2. As regards communication, the taluk is pretty well off except on the Amritur and Koppa side. The road *via* Huliurdurga from Kunigal to Maddur in the line of the new Railway will hereafter acquire great importance. But Huliurdurga and the adjacent hilly tracts are noted to be unhealthy and they are all very sparsely populated.

The present rates of assessment are low in most parts of the taluk, and it is feared that the Survey will disclose both great inequality of rates and considerable under-estimate of the extent of occupied lands. There is no doubt that the present aggregate land revenue is disproportionately small when compared with the extent and quality of the land available for cultivation, and the same has always been readily collected.

In 1836-37 and 1848-49 the dry rates prevailing in the taluk (which then consisted of the 5 hoblis of Kunigal, Kottigere, Yedayur *Hebbur and *Chittanahalli) were in several instances raised to rates varying from Rs. 0-11-8 to Rs. 1-8-0 per dry vakla. The increase was in some cases due to the fact that the rates had been irregularly lowered upon new darkhasts for mamul landayam lands, and in other cases it was professedly due to an estimated capacity of

* Now in the Kadaba Taluk.

the lands to bear a higher rate of assessment. Upon complaint in 1855—56 those lands, on which the dry rates previous to the enhancement of 1836—37 and 1848—49 had ranged from 0—3—6 to 0—8—0, were assessed at Rs. 0—9—4 instead of the rates adopted in the years last mentioned. Rs. 0—9—4 was at the same time fixed as the general rate for new lands thereafter to be taken up.

As regards mulberry lands the rate per kolaga of 750 square yards was Rs. 0—5—10 under His Highness' administration. In 1835—36 it was raised to Rs. 1—2—8 and then reduced in 1855—56, and is now regulated according to the scale in the margin prescribed in Chief Commissioner's Proceedings No. 1144—35, dated 7th June 1872.

Rs. 0-12-0 } Per wet kolaga
 " 0-8-0 } Under tanks,
 " 0-7-0 } Per do
 " 0-6-0 } under wells.
 " 0-3-3 } Per dry kolaga.

Mulberry cultivation has nearly ceased to exist and these special rates need not be maintained.

Regarding the Huliurdurga, &c. Sammats which formerly belonged to the late Huliurdurga Taluk of the Bangalore District, details as to the past revenue management are not readily available from the records in my office. The Koppa and Amritur Hoblis though not readily accessible to traffic may nevertheless bear fairly high rates of assessment, while the hilly sammats of Huliurdurga, Utridurga and Bedarahalli by reason of the comparative barrenness of the soil and a small population can bear only very light rates of assessment.

I have the honor to be
 Sir,
 Your most obedient Servant,
 K, SESIAIDRI IYER,
 Deputy Commissioner.

Mis. No. 35.

DEPUTY COMMISSIONER'S OFFICE,
 TUMKUR DISTRICT,
 Tumkūr, 4th May 1881.

From
 The Deputy Commissioner, Tumkūr District.

To
 The Superintendent, Mysore Revenue Survey

SIR,

In acknowledging the receipt of your letter No. 196, dated 16th March 1881, on the proposed settlement of the Kunigal Taluk, I have the honor to make the following observations.

2. The area of occupied Government lands according to the Survey is 89,906 acres, the bijavari area entered in the revenue accounts being equivalent to only 53,348 acres. As stated in my letter of the 6th September last, I was prepared to find that the extent of occupied land in this taluk had been considerably under-stated in the revenue accounts, but the increase of over 68 per cent now disclosed by the Survey is unusually large and such as cannot be wholly due to the incorrect bijavari entered in the old accounts. It will probably be found upon enquiry that much land that is actually not occupied has been entered in the Survey Department as occupied by the inclusion in holdings of lands which are now really Government waste. This will be evident at the settlement when much land must owing to this cause be expected to be given up.

In the case of rice and garden lands under the amāni kēras especially, I fear there has been such enlargement of holdings to a very great extent as may be seen from the subjoined table, :—

Villages.	Extent in acres—Occupied Lands.	
	According to Revenue Accounts.	According to Survey.
1. Begur Amani. ...	396	595
2. Kanchigalpur Amani ...	83	250
3. Kottigere Amani ...	90	216
4. Ramban Hanta ...	237	447
5. Kitnamangal Amani ...	81	205
6. Nilatahalli Amani ...	57	158
7. Kantarahalli Mavinahalli ...	19	140
8. Nademavinapura... ..	67	224
Total	1,030	2,235

Such great inequalities as are shown above are to some small extent due to a classification different from what now exists and to under-statement in the old accounts, but the larger part of it is doubtless due to the inclusion of Government waste lands in occupied holdings.

3. The rates of assessment proposed however appear to be intrinsically moderate being on an average Rs. 4—15—1, Rs. 4 and Rs. 0—11—7 per acre of garden, rice and dry land respectively. These rates though slightly higher than the very unequal and in many cases unduly low rates now prevalent are such as the taluk can well bear. The loss of population owing to famine has not been so great as is estimated in your report, for the census of last February shows a total population of 58,783, being a decrease of 31 per cent from the population of 1871; whereas the decrease in other parts of this District has been so large as 36 and even 40 per cent. The condition of the ryots in the Kunigal, Kottigere and Yedayur Sammats is very fair, and I find that the rates for Huliurdurga, Bedarahalli and Hutridurga Sammats are very moderate indeed. On the whole, therefore, I am of opinion that the proposed settlement will not press hard upon any part of the taluk.

4. Owing to the absence of correct information as to the exact extent of lands now under occupation, I find it impossible to institute any useful comparison between existing and proposed rates in those villages in which a large increase of total assessment is expected to result. Some of these villages are referred to in para 2 of this letter and the excess of area returned by the Survey as occupied in them contributes to the estimated excess of revenue to a much larger extent than the increased rates. In the case of those villages an increase in extent from 1,030 to 2,235 acres shows an increase of revenue from Rs. 6,057 to Rs. 12,000.

5. With reference to the remarks in paras 21 and 22 of your report that in 1866—67 batayi rates began to be superseded by nagadiyat rates and that the steady decline of the revenue since then has been due to the conversion of batayi into nagadiyat, I would observe that in 1865—66 the total extent of land cultivated was 7,634 kandis and in the following year 1866—67 it was only 6,568 kandis. This large falling off in the extent of cultivation in itself accounts for the large decrease in revenue from Rs. 96,778 in the former year to Rs. 80,891 in the latter, thus it will be seen that the decrease was due not so much to *any conversion* of batayi into nagadiyat as to the reduced extent of batayi cultivation. In 1867—68 there was more batayi cultivation and as a consequence the large revenue of Rs. 93,151 was realized. Since then batayi cultivation has been discouraged and neglected more and more year after year, and we find therefore a steady decrease both of the total extent of land cultivated and of the gross Government revenue. As a result of the famine much nagadiyat land has been abandoned and scarcely any batayi cultivation undertaken, and thus we find from the statement in para 20 of your report that the extent of land under cultivation during 1879—80 is the smallest during the last 20 years.

6. The original enclosures to your letter under reply are herewith returned.

I have the honor to be

Sir,

Your most obedient Servant,

K. SESHADRI IYER,
Deputy Commissioner.

*Proceedings of the Dewan to His Highness the Maha Raja of Mysore,
(Revenue),—dated 19th May 1881.*

No. 1264-75—17, DATED 19TH MAY 1881.

ORDER THEREON.—The report of the Survey Superintendent gives full details in regard to the terms of the proposed settlement of the Kunigal Taluk.

2. The maximum rates adopted are on the whole a little lower than those sanctioned for the adjoining Taluk of Magadi, and the subjoined statement exhibits the results of the settlement on the different descriptions of lands :—

					Government Occupied Lands.			
					Survey Area.	Collections of 1879—80.	Survey Assessment.	Average Rate per Acre.
					Acres.	Rs.	Rs.	Rs. A. P.
Garden ...	...	...	...	...	3,366	71,257	16,631	4 15 1
Rice ...	...	...	...	...	5,488		21,966	4 0 0
Dry Crop ...	...	...	...	...	81,052		58,597	0 11 7
Total.....					89,906	71,257	97,194	...

3. The above shows in the aggregate an increase of Rs. 25,937 over the actual collections of 1879—80, besides an increase in the amount of local cess resulting from the enhancement of the rate from $\frac{1}{2}$ to 1 anna per rupee. Against the above increase must be set off the remuneration payable to village officers estimated at Rs. 6,000, and the annual contribution to be set apart for the Irrigation Fund amounting to Rs. 2,270, and it is also expected that the amount of the proposed settlement will be considerably reduced by large relinquishments of lands.

4. The area under occupation, which according to old accounts amounted to 53,348 acres, has been found by the Survey to comprise 89,906 acres. This unusually large increase, whilst partly due to errors and under-estimates in the old accounts, is also attributed to a very large extent to the inclusion of Government waste lands in occupied holdings which are likely to be hereafter relinquished at the settlement. Some very striking instances of these excesses even in rice and garden lands are given in the Deputy Commissioner's letter. It is not clear whether this is due to the ryots pointing out waste lands as part of their occupied fields, or to the inclusion of such waste lands by the Measurers for the convenience of measurement without reference to the ryots' wishes. If the latter, instructions should be issued against such procedure, especially in regard to wet and garden lands as it must necessitate the relinquishment of lands by the poorer classes of ryots much against their wish.

5. The settlement nevertheless, it is believed, would, on the whole, show a decided improvement over the present collections, though it is not likely to exceed the high collections realized in some of the previous years under the batayi system and under the then prevailing high prices. From the statement given in para 20 of the Survey Superintendent's report, it will be seen how from 1870—71 the collections have fallen off owing to the substitution of a money assessment for the batayi system, although the area under occupation shows no diminution. Fair and equal rates of money assessment being fixed, it is far preferable that the Government should look for its increase of revenue to the prosperity which the ryots are likely to attain under such a fixed assessment than to the accidence of the batayi system. The proposed settlement, it is believed, whilst fully securing the interests of Government, will also prove conducive to the prosperity of the taluk.

6. The fluctuations noticed in the settlement of individual villages are doubtless due to inequalities in the old assessment and also probably to the inclusion of waste lands in the settlement as already referred to. In one instance however, viz.,

*Proceedings of the Dewan to His Highness the Maha Raja of Mysore,
(Revenue),—dated 19th May 1881.*

Kanchgalpur Amanikere, the increase from Rs. 363, the collections of 1879—80, to Rs. 1,749 calls for explanation. It is probably due to the lands having lain waste in the former year.

7. With reference to the remarks of the Survey Superintendent in para 7 in regard to the absence of sugar-cane cultivation under many tanks possessing an ample supply of water, it must be remarked that such expensive descriptions of cultivation are dependent on the available resources of labor and manure in the individual villages as well as on water-supply. It is this fact which renders it undesirable that the classification of lands into garden should be based on the accident of the description of cultivation which may happen to be carried on on the lands at the time of the settlement.

8. The details of garden land situated under tanks and wells or possessing no artificial irrigation are given in para 27 of the report. It is worthy of consideration whether lands possessing tank irrigation should not be all classed as wet without the further distinction of tank irrigated gardens.

9. The waste arable land available for cultivation is very extensive. The attention of the Deputy Commissioner is drawn particularly to the large extent of wet arable land remaining waste in view to his investigating and reporting on the cause of such an unusual fact. If it is due to the neglect of irrigation works, measures should be at once adopted for placing them in an efficient state of repair.

10. With these remarks, the Dewan sanctions the proposed settlement with the usual guarantee for thirty years.

FINANCIAL.

*Proceedings of the Dewan to His Highness the Maha Raja of Mysore,
(Financial),—dated 6th May 1881.*

READ—

Letter No. 485 of the 16th February 1881, submitting proposals for revising the existing Distillery Establishment.

No. 873-5—15, DATED BANGALORE, 6TH MAY 1881.

ORDER THEREON.—There seems no necessity for the very large increase of the Distillery establishments recommended in the above. The annual revenue of the Mysore and Hassan Districts can bear no comparison with that realized in the Nundydroog Division, and as the salaries of the officials have already once been raised to what was considered fair and sufficient, no further increase can be sanctioned. An addition of a Daroga or Deputy Supervisor on Rs. 35 + 15 Rs. horse allowance for the inspection of the shops in the two Districts, and of a Tester for the Hassan District on Rs. 15 and two additional peons on Rs. 6 each is sanctioned. These additional hands should be appointed from the existing Abkari establishments at Hassan and the remainder of the latter should be at once dispensed with.

R. VIJAYINDRA RAO,
Secretary.

To—The Dy. Commrs. of the Mysore and Hassan Dts.
„ Comptroller of Mysore.

*Proceedings of the Dewan to His Highness the Maha Raja of Mysore,
(Financial),—dated 30th May 1881.*

No. 1605—CIB. 39, DATED 30TH MAY 1881.

ORDER.—The inconvenience of the special Rules now in force in this Province in regard to gratuities given to inferior servants on a salary of Rs. 10 and under has been for some time felt. These Rules provide for a gratuity of a month's pay for each year of service up to 30 years without any arrangement for pension. They had been specially framed for the large reductions of Palace Establishments which had to be effected in 1868 on the death of His Highness, the late Maha Raja, and being thought to have worked successfully, they were afterwards, on the recommendation of Mr. Bowring, applied to the inferior public service of the Province in general.

2. There is however no analogy between the two cases. The peculiar claims of the Palace Establishments referred to required special consideration at the time. But the permanent application of the Rules has been found costly and open to objection. Although medical certificates are prescribed, the Rules place a temptation before the old servants to seek the large amounts of gratuities provided for. The gratuities when received are soon spent, and the recipients after long service are obliged to throw themselves on public charity or to seek appointments again in indirect ways.

3. It will be more convenient to Government, and also in the interests of the servants concerned, to pay to such old and deserving servants small monthly pensions as provided for by the Rules in force in British Territory, instead of a large amount of gratuity at once. As there is no reason why the British Rules should not equally answer for this Province, the Dewan, with the sanction of His Highness the Maha Raja, directs that the British Rules, as contained in Section 76 of the Civil Pension Code, 4th edition, be reverted to as regards the inferior service in all Civil Departments in the Province, in supersession of the existing special Rules. The Rules referred to provide for compassionate allowances not exceeding Rs. 4 per mensem for 30 years' service and upwards, with gratuities for shorter service as hereunder :—

For service of less than five years	..	..	Nil.
Do of not less than 5 years but less than 10 years	..	3 months' pay.	
Do do 10 do	15	.. 4 do	
Do do 15 do	20	.. 5 do	
Do do 20 do	30	.. 6 do	

4. These terms of gratuity cannot be regarded as liberal, but they can apply to this Province equally with British India, and all hardship will be removed if, in deserving cases, the sons of the retiring servants were given appointments if found qualified. Cases of exceptionally good service of less than 30 years calling for pensions may also be specially dealt with.

PART I.

GENERAL.

*Proceedings of the Dewan to His Highness the Maha Raja of Mysore,
(General),—dated 8th May 1881.*

READ—

Letter from the Deputy Commissioner of the Mysore District, No. 46 of the 29th April 1881, forwarding an application from Subbanna and others of Nazarabad in the Town of Mysore requesting permission to build a temple in Nazarabad.

No. 837-44—13, DATED BANGALORE, 6TH MAY 1881.

ORDER THEREON.—The object of the reference is not stated in detail. In deciding upon applications of the kind, two considerations have to be taken into account. 1st. Whether the site proposed is unobjectionable as regards its situation in relation to the road and the neighbourhood, and upon this point no decision can be arrived at in the absence of a plan showing the position of the site. 2ndly. The subject has to be viewed with reference to the arrangements lately made it is believed without adequate necessity, prohibiting the playing of music on the road in front of religious buildings. In view of this fact, the construction of religious buildings can only be permitted in minor streets and lanes the inhabitants of which are of the same creed and generally desire it. Religious buildings on high roads and thoroughfares should not be allowed to be built except under a distinct agreement that no objection is to be made to the playing of music on the roads in front of the buildings.

R. VIJAYINDRA RAO,
Secretary.

To—The Deputy Commissioner of the Mysore District.
„ Deputy Commissioners of other Districts.

CENSUS.

No. 937-52—18 DATED BANGALORE, 8TH MAY 1881.

ORDEE.—In continuation of Proceedings dated 7th March 1881, No. 6973-90—Mis. 981, the following instructions with revised forms are laid down for tabulating the results of the Census.

2. Table No. 1 as now revised shows the village population classified according to Age, Religion and Civil condition. The details of Education under three periods of age and under the respective heads of religion are also to be shown at the foot of the statement as provided for in the form. The statement will be ordinarily comprised in the 1st page of the sheet, which contains separate heads for the four classes of Hindus and for Muhammadans.

3. Jains who in this Province form an integral part of the Hindu population will be conveniently included under the 2nd division of Hindus. The various castes to be included under each of the 4 divisions of Hindus are shown in the accompanying List of Castes A.

4. Where Christian population occurs in towns or special villages, the statement will be continued on for them on the 1st half of the 2nd page, where a further head of "Others" is also provided for persons not included in the above, *viz.* Parsis, Jews, Sikhs and Buddhists.

5. On the remaining half of the 2nd page, Tables Nos. 2, 3 and 4 are provided, for Language, Birth-place and Infirmities. Tables 2 and 3 require no explanation. In Table 3 two additional columns are opened to show the number of people speaking the different languages who are born within the Province and who are born outside.

6. In Table No. 4, infirmities are required to be shown separately for the different religions and for each quinquennial period of age, *viz.*, up to 4, 5 to 9, 10 to 14, 15 to 19 and so forth; but as the cases of infirmities will be rare, it is not necessary to fill in the statement with all the religions and all the quinquennial periods of age. The religions and the quinquennial periods of age in which the infirmities actually occur in the village need alone be entered.

Village Table No. 4.

*Proceedings of the Dewan to His Highness the Maha Raja of Mysore,
(General),—dated 8th May 1881.*

7. On page 3, the population, male and female, under each caste and sect as per List A is to be shown. An additional column is opened to show the number of persons under each caste who are recorded in the schedules as *owning* lands, whether they be non-cultivating land-holders or cultivating land-holders.

8. Brahmans are to be classified under the different sects of Smarta, Mádhyā, and Srivaishnava; but no distinctions of sect are to be entered for the other castes of Hindus. Jains will be entered as a separate caste under the second division of Hindus or that of superior castes other than Brahmans. Muhammadans, Christians and others are to be classified as shown in List A for reasons explained in previous memorandum.

9. The castes amongst Brahmans are numerous as per separate List B accompanying; but as in the general returns the Brahmans will be classified simply into the three sects of Smarta, Mádhyā and Srivaishnava, further details of caste are useful merely to show the prevailing tribes of Brahmans in each village. It will therefore suffice to show separately the principal tribes prevailing in the village under the respective sects to which they belong, grouping the rest of the Brahmans under each sect under the head "Others."

10. With regard to the other classes, the various castes shown in the list are important, and it will be desirable to know the total population of the Province under each. It is therefore necessary that the number of the population in the village under each of the castes should be entered, and that where the entries of castes in the schedules do not exactly correspond with the list, the persons should be entered under the particular caste in the list to which they are nearest allied.

11. In order to show the various churches for the Christian population, a separate Table 5 A is furnished. This need be prepared only for large places where Christian population belonging to different churches prevail. Where the Native Christian population ordinarily occurring in villages are, as is generally the case, entirely Roman Catholics, it will be sufficient to designate them as Roman Catholics in Table No. 5, and the separate Table 5 A will not be required for such cases.

12. The 4th page of the sheet contains Table No. 6 showing the occupations under the several heads of religion for ages under and above 15 years, first for males and afterwards for females. This statement where the space is not found sufficient, may be continued on separate pages for which spare printed sheets will be supplied. But ordinarily the population details of a single village will be brought into the 6 tables on a single sheet of four pages.

13. To correspond with the English Tables, the occupations should be classified under the 6 Classes and under the Orders and Sub-orders shown in the accompanying List C. As several of these orders and sub-orders are not likely to occur in the rural villages ordinarily, they are not printed in the table, and the Tabulator is expected to enter in detail, the occupations actually occurring in the village, arranging them under the Class, Order and Sub-order to which they belong.

14. The agricultural population should be carefully arranged under the 6 Sub-orders shown under Order No. 8, Class IV. The directions given in the latter part of clause 1, para 16 of the Enumerators' Instructions for entering for persons combining agriculture with other occupations both the occupations, need not be carried into the tabulation. Such persons should be classed only under the occupation which forms the chief source of their income. The difference between the number of land-holders entered in Table No. 5 and that shown in Table No. 6 would represent the number of persons living by other occupations who own lands.

15. The classification under Class VI should also be strictly adhered to.

16. With regard to the Government servants, it is believed that the Enumerators have generally entered them simply as such, without specifying the branch of the Government service to which they belong. The Government servants will have therefore

*Proceedings of the Dewan to His Highness the Maha Raja of Mysore,
(General),—dated 8th May 1881.*

to be entered under a single head in Table 6 without any sub-divisions; but with regard to the Commercial and Industrial classes, the general Order and Sub-order shown in the list will not suffice. The particular trades and occupations followed as entered in the schedules should be specified in the Village Tables under each Sub-order.

17. The above 6 Tables contain all the information required for the final returns prescribed by the Census Commissioner, and a great deal more which will be of considerable value for local purposes. Two copies of these Tables will be filled in for each village, one in English and the other in Kanarese, the former to be sent to this Office and the latter to be retained in the District.

18. With regard to the mode of compiling these Village Tables from the schedules, it is found that a separate Working Register for Table No. 1. will be required for Table No. 1; but objections are raised to the system of noting in this register each entry by a tick, as the errors which are very apt to occur cannot be detected except by going over the whole process again. It is therefore preferred to note the entries under the several heads for each schedule of the village separately, and then total the results for the village, as this will facilitate re-examination and correction. A supply of this Working Register Form is forwarded. A separate form can be used for each head of religion in large villages; but where the population is small, several religions may be entered one after another on the same form, providing sufficient space for each. The form contains the several heads of Civil Condition and Age. The number of each schedule or house being entered across at the head, the totals of the entries for that schedule are to be entered under the respective heads and for each age occurring in the schedule, then to be followed similarly by the totals of the next schedule belonging to the same head of religion. Where the persons in a schedule belong to different religions, as the master and servant in a house are likely to be, the portions appertaining to each religion are to be entered in the Working Register for that religion.

19. The above Working Register can be utilized to show also the statistics of education by noting by the side of each figure the letter "L" (or "ಲ" in Kanarese) for "Learning," "K" (or "ಕ" in Kanarese) for "Knows," and "N" (or "ನ" in Kanarese) for "Does not know."

20. A Working Register for Table No. 6 may also be required, and printed forms for the same are forwarded, to be filled up separately for males and females. These forms provide headings only for the various sub-divisions of the Hindu religion, and a separate blank head for Muhammadans or any other religion occurring in the village and they will be found sufficient in most cases. Where there are more religions to be entered in any large village or town, an additional form for the same may be used. Forms with blank headings are supplied for the purpose.

This Working Register for Table No. 6 may be filled in on the ticking system as it is not so complicated as Table No. 1.

21. The remaining Village Tables which are simple may be filled up directly from the schedules by totalling the entries with the aid of a slate or otherwise.

22. When the Village Tables are completed and examined, and it is hoped they may be not later than the middle of July, the results should be totalled up in exactly similar tables first for the Taluk and then for the District. Working forms for this purpose will be hereafter furnished.

23. The Assistant Commissioners in charge of Census Work should report from time to time how they are proceeding with the work, and in what manner they examine and verify the entries. They should also, as they examine the tables for each village, prepare a memorandum noting any peculiar features which they may find deserving of attention in the details of the population of the village.

C.

The Classes, Orders and Sub-orders in the subjoined list of occupations generally correspond with the English list except under Class IV, in which a different arrangement suited to the requirements of the country had to be adopted.

2. Class I, Order 3, Sub-order 5, might, to some extent, occupy the same ground as similar occupations under the industrial class. But a distinction could be well maintained if the former were restricted to artists of the learned class.

3. In the various Sub-orders of Order No. 3, as well as under most other heads, provision is made for showing separately the superior men who represent the respective occupations from the subordinate menial establishments employed in connection with their occupations, there being no other place for the latter in the list.

4. There is also some mixing up of the retail tradesmen in Sub-order 2 of Order No. 6 with the dealers included under the various heads of the industrial occupations, but mistake in this respect will be avoided by taking care to restrict the latter to those who work and deal in the articles made by themselves as distinct from tradesmen selling articles made by others

CLASSIFIED LIST OF OCCUPATIONS.

Class I. Professional Class.

ORDER I. His Highness the Maha Raja and Members of the Royal family.

ORDER IA. Government Servants.

Sub-order (1.) His Highness' Court and Palace or Household Establishments.

(General),—dated 21st May 1881.*

READ—

Letter No. 691—10, dated 5th February 1881, from the Deputy Commissioner, Bangalore District,

No. 927-34— 17, DATED BANGALORE, 9TH MAY 1881.

ORDER THEREON.—In cases like the one under notice where a Village Shanbhog or other official holding a hereditary office has to be dismissed on account of an offence, it is not proper except in extreme cases that the family should be altogether deprived of their right to the office by the unqualified appointment of a stranger to it. Nor could such a new nominee claim a hereditary right in the office. The proper course to pursue in the event of no divided members with totally separate interests being available is to appoint to the office a stranger for a limited period, say 10 or 20 years, with the reversion of the office at the end of that term to the heirs of the dismissed official.

2. The Deputy Commissioner is requested to adopt the above course in the case under notice, and to restrict the term of the dismissal of the Shanbhog to a period of 15 years.

R. VIJAYINDRA RAO,
Secretary.

To—The Deputy Commissioner, Bangalore District.
„ Deputy Commissioners of other Districts.

From the Superintending Engineer of Mysore, Public Works Department, To the Dewan of Mysore, No. 1322, dated Bangalore, 6th April 1881.

As requested in Chief Commissioner's Proceedings No. 6557—1705, dated 21st December 1880, I have the honor to forward copy of a Memo on Travelling Allowances of Upper and Lower Subordinates. This memo has been drawn up by the Examiner in consultation with me and with Major Bowen, and I recommend it for adoption.

II. In order that the alteration may commence with the official year, I have circulated orders to adopt the modified scale pending decision.

III. I take this opportunity with reference to General Department Notification of the 26th November 1880, publishing certain rules relating to travelling allowances, &c., of officers, to inform you that the salaries and travelling allowances of officers belonging to the Imperial Public Works Department are fixed and can only be modified by order of the Government of India. I brought this circumstance to the notice of the Chief Commissioner, who passed the following order thereon dated 5th March.

“The order must be reconsidered for it cannot properly apply to those to whom the codal orders apply. To all officers of the local service the orders will of course apply.”

TRAVELLING ALLOWANCES OF UPPER SUBORDINATES.

Proceedings of the Chief Commissioner, Mysore, General Department, No. 6557— G. 1705
of 21st December 1880.

In the above Proceedings the Chief Commissioner calls for an expression of opinion on the subject of the travelling allowances to be given to the Upper Subordinates of the Local Public Works Department, from the Comptroller and the Superintending Engineer.

At the request of the Superintending Engineer, I have the honor to state, that in my opinion the rules for the grant of allowances should be as follows :—

1stly. That the Rules in the Public Works Code regarding the travelling allowances of Upper Subordinates be adopted in their entirety, and that whenever the practice in force differs therefrom such practice be discontinued.

c. g. (i.) Chief Engineer's Circular No. 148 of 20th December 1871 be cancelled.

(ii.) The special grant of full daily allowances to Mr. Scaldwell sanctioned in Officiating Superintending Engineer's No. 1071 of 21st March 1878 be discontinued.

(iii.) That double horse allowance which is now universally granted be only given in special cases.

Serjeant Heinig is the only Upper Subordinate who draws single horse allowance.

*Proceedings of the Dewan to His Highness the Maha Raja of Mysore,
(General),—dated 21st May 1881.*

2ndly. That "Double" allowances in the Malnad Taluks be continued.

The allowances now drawn are as follows, when absent from head-quarters more than half the month—

Sub-Engineer	..	Rs. 3 per diem.	} For whole month.
Supervisor	.	" 2 "	
Overseer	..	" 1½ "	

Otherwise—

The above allowances for the actual number of days absent from head-quarters, and at the rate of Rs. 30 per mensem for the remainder of the month.

When a journey is made of over 20 miles under special sanction of Executive Engineer, mileage instead of daily allowance is given at the following rates :—

Above rank of Overseer	..	As. 5 per mile.
Overseer	..	As. 2 "

The allowances that will in future be drawn, if this proposal be accepted are—

Sub-Engineers	..	Rs. 3 per diem	} For the number of days during which they are actually absent from head-quarters.	P. W. Code, IV, iii, 66.
Supervisor	..	" 2 "		
Overseer	..	" 1½ "		

for the rest of the month, at the rate of Rs. 15 per mensem.

Mileage for journeys over 20 miles *only when sanctioned in each instance by Executive Engineer*—

Above rank of Overseer	..	As. 5 per mile.
Overseer	..	As. 2 "

An Upper Subordinate in charge of works which do not require his travelling frequently a greater distance than he can conveniently do on foot, will ordinarily get Rs. 15 per mensem, single horse allowance. Special sanction in each case, to the grant of higher allowances, will be requisite.

I would take this opportunity of raising the question of the allowances to be given to Lower Subordinates of whom no mention has been made.

The Rules in the Public Works Code may be taken in their entirety, no alteration being necessary.

Public Works Code, IV. iii, 67.

These allowances are as follows :—

When on duty at fixed head-quarters, but with occasion to travel frequently 10 miles a day, or when marching on duty, and being provided with shelter, Rs. 7½ per mensem.

When in active inspection of a sub-division or when having occasion to march frequently over 10 miles a day and being unprovided with shelter, Rs. 15 per mensem.

For journeys over 20 miles a day, *only when specially sanctioned by the Executive Engineer*, one anna per mile.

No. 1308-10—13, DATED 21ST MAY 1881.

ORDER THEREON.—The rates of travelling allowance provided for in the above rules are sanctioned for the present with effect from the 1st April 1881.

2. It may hereafter be desirable to assimilate the rates of travelling allowance in the Public Works Department with those of other Departments as regards the subordinate grades of the local service also, as has already been done in regard to the superior service.

3. With reference to para 3 of the Superintending Engineer's letter, the notification of the 26th November 1880, so far as it affects the officers belonging to the Imperial Public Works Department, is cancelled.

R. VIJAYINDRA RAO,
Secretary.

To—The Superintending Engineer, Public Works Department in Mysore,
with 30 spare copies.

„ The Comptroller.

„ The Examiner, Public Works Accounts.

PART II.

JUDICIAL.

114	The plans of two blocks of land, one square mile each, selected by Mr. P. A. Cole, Deputy Collector of Coimbatore and Mr. A. M. Smith of Bangalore, respectively, for mining purposes in the Honnali Taluk, were forwarded to the Deputy Commissioner of the Shimoga District for the submission of a statement showing the description and extent of the lands applied for.—Copy to Messrs. Smith and Cole who were requested to arrange for the purchase of the occupied and inam lands situated within their respective blocks.	Do	do
115	In reply, Mr. Leighton was informed that his application for a square mile of land for mining purposes in the Banavar Taluk would be considered on his selecting the land and applying for the same with the necessary plan.	Do	do
116	In reply, the Deputy Commissioner of the Kadur District was informed that no exclusive rights for prospecting could be granted, but that Mr. Galiffe's application would be taken into consideration on his selecting a specified tract of land not exceeding one square mile in extent and applying for it with the necessary plan, and that no applicant was as a rule allowed to take up more than one square mile for mining purposes.	Do	do
117	A copy of the above together with Major-General Morgan's letter were forwarded to the Deputy Commissioner of the Tumkur District, with a request that the usual details in regard to the land applied for might be furnished.	Do	do
118	In reply, Mr. R. Morgan, Deputy Conservator of Wynad Forests, was informed that his application for one square mile of land in the Chiknayakanhalli Taluk for mining purposes would be taken into consideration on his selecting the land and applying for the same with the necessary plan.	Do	do
119	In reply, Mr. E. Barclay, Madras, was informed that if lands required for the mining purposes in the Sagar and Attikuppa Taluks, were selected and applied for with the necessary plans, his application for a lease not exceeding one square mile would be considered.	Do	do
120	In reply, Mr. T. Craig of Mercara was informed that his application for a specified tract of land not exceeding one square mile would be considered on his applying for the same with the necessary plan.	Do	do
121	The plan of a block of one square mile of land selected by Major-General Otley for mining purposes in the Honnali Taluk, was forwarded to the Deputy Commissioner of the Shimoga District, for the submission of a detailed statement showing the numbers, area, &c., of the lands comprised in the block, distinguishing occupied and inam lands which should be purchased by the applicant before they could be granted on lease to him.—Copy forwarded to Major-General Otley, with the intimation that in the event of his taking up the above block in preference to the one in the Chiknayakanhalli Taluk applied for by him, he should arrange for the purchase of any occupied and inam lands included in the same in communication with the Deputy Commissioner.	Do	do
122	In reply, Mr. P. A. Cole, Coimbatore, was informed that lands could not be granted to him in the Banavar and Sagar Taluks for mining purposes, as he had already been allowed to take up a square mile in the Honnali Taluk.	Do	do
123	The season report for the week ending 21st instant, was telegraphed to the Secretary to the Government of India, Home, Revenue and Agricultural Department.	Do	do
124	In reply, Lieutenant-Colonel Cole was informed that no concessions for prospecting were given, but that his application for a specified tract	Do	do

No.	Subject and Order.	Date of Order.	Date of previous Orders.
	of land not exceeding a square mile would receive consideration on its being submitted with the necessary plan, provided that no one else had previously selected and applied for the same, and that no individual was allowed more than a square mile in the Province, until the mile first granted was fully worked.		
125	In reply, Mr. F. Rowlandson, Madras, was informed that permission could not be granted to him to take up lands for mining purposes in the Banavar and Honnali Taluks, as he had already been allowed to take up a piece of land in the Chiknayakanhalli Taluk.	25th May 1881.	
126	In reply, Mr. H. Bill, Madras, was informed that his application for land for mining purposes in the Banavar Taluk would be considered on his selecting the same and applying for it with the necessary plan.	Do do	
127	In reply, Dr. Farguhar, M. D., Bangalore, was informed that his application for a block of one square mile in the Banavar Taluk would be considered on his selecting the same and submitting his application with the necessary plan.	Do do	
128	The statement of prices current of food grains for the fortnight ending 15th instant, was returned to the Deputy Commissioner of the Shimoga District for correction.	26th do	
129	Petition No. 388 from one Venkatramanna of Narsapur in the Malur Taluk, regarding the refund of excess assessment paid by him, was forwarded to the Deputy Commissioner of the Kolar District for report.	Do do	
130	With reference to a refund bill submitted by the Deputy Commissioner of Shimoga District for Rs. 7 payable to Narasimhaiya and Krishnappa of the Nagar Taluk, he was requested to state whether the stamp duty including the above sum had been collected on the total value of certain property sold and he was informed that in such case no refund was due.	30th do	10th Dec. 1880, Part II, R.
131	The Deputy Commissioner of the Mysore District was informed that the orders passed by him in the case of petitioner Muddasetti of Heggavadi in the Chamrajnagar Taluk, regarding the restoration of certain Chakranam lands, and of the right of way by the side of the petitioner's land, &c. were confirmed and that for reasons stated the fine imposed on the petitioner was remitted.—Communicated to the petitioner by endorsement.	Do do	7th Jan. 1881, Part II, R.
132	The attention of the Comptroller was drawn to certain differences in the Octroi receipts of 1879—80 between his statement and those received from the Deputy Commissioners of Districts.	Do do	
133	With reference to an estimate received for the repairs of the Farm house and the bungalow attached to it, the Deputy Commissioner of the Bangalore District was informed that as the buildings were to be sold there was no occasion for spending any money on their repairs and he was requested to report what arrangement could be made for their sale at an early date.—Communicated to the Superintending Engineer.	Do do	21st Jan. 1881, Part II, R.
134	The Deputy Commissioners of Districts, excepting Kador and Shimoga, were requested to expedite the submission of the demand, collection and balance statements for March 1881.	Do do	
135	The attention of the Deputy Commissioners of Shimoga and Kador was drawn to certain deficiencies in their statements of coffee cultivation for 1880.—Communicated to the Deputy Commissioners of the Kolar and Hassan Districts with the remark that their returns for the above year called for no remarks.	Do do	
136	In reply, Mr. Henry Bill was informed that as a special case he would be allowed on behalf of Mr. Turnbull to take up a square mile in the Chiknayakanhalli Taluk after 6 prior applicants had made their selection.	Do do	
137	The sale of the Kayamgutta Rampura Dinne village was confirmed and communicated to the Deputy Commissioner of the Kolar District.	Do do	19th Jan. 1881, Part II, R.

No.	Subject and Order.	Date of Order.	Date of previous Orders.
138	The Deputy Commissioner of the Chitaldroog District was informed that the deposit to be taken from the toddy contractors must be calculated on the annual rent inclusive of the local cess.—Communicated to the Comptroller and the Deputy Commissioners of other Districts.	30th May 1881.	
139	The Deputy Commissioner of the Kadur District was requested to submit a full report on the situation and area of the Barimale jungles and of the portion applied for by Mr. Rolland for the cultivation of cardamom.	Do do	
140	The Deputy Commissioner of the Bangalore District was informed that the petitioners Ramaiya and Venkatramanna of Chiknayakanhalli in the Bangalore Taluk had no hereditary claim to the Archdeacon of the Avalhalli Anjaneyaswami's temple, and that as they had been removed for misconduct their petition of appeal was rejected.	Do do	
141	A manuscript copy of the return of prices current of food grains in the Province for the fortnight ending 15th instant, was forwarded to the Assistant Resident for submission to the Government of India.	Do do	
142	The Deputy Commissioner of the Shimoga District was informed that under the explanation given, the petitioner Basalingappa of Haromuchadi village in the Shikarpur Taluk was liable to the payment of the aya l.e being the proprietor of lands situated in an inam village.	Do do	
143	As proposed by the Deputy Commissioner of the Shimoga District, the postponement of khista due on certain villages of the Honnali Taluk and the remission of Hulbanni rent on them amounting to Rs. 109-8-0, were sanctioned.	Do do	
144	The Deputy Commissioner of the Bangalore District was informed that under the circumstances stated there was no alternative but to lease out the late Experimental Farm lands for another year adopting early measures for their disposal next year.—Communicated to the Superintendent of the Revenue Survey.	Do do	
145	Petition No. 2102 of 1880—81 from Narasimha Raddi of Gerigepete, Goribidnur Taluk, was forwarded to the Deputy Commissioner of the Kolar District for enquiry and disposal.	Do do	
146	Petition No. 2216 of 1880—81, from Muni, widow of Jodi Muttia of Jakkasandra Agrahar, Bangalore Taluk, was forwarded to the Deputy Commissioner, Bangalore District, for disposal with the remark that if the petitioner's land was not irrigable except by a costly work beyond the means of the petitioner, dry assessment might be levied.	Do do	4th August 1880, Part II, R.
147	The Deputy Commissioner of the Bangalore District was informed that the orders conveyed in Proceedings of the 11th instant required that the loss of duty to Government from the deficient sales of 1878—79 should be set off against the increase derived from excess sales in the two following years, &c.	Do do	11th May 1881, Part II, R.
148	Certain orders were communicated to the Deputy Commissioner of the Kadur District, with reference to his different recommendations for the one and same lands called "Heggan" in the Koppa Taluk.—Communicated to the Deputy Commissioner, Hassan District.	31st do	
149	On the representation of Mr. F. W. Smith, Toddy Contractor, Bangalore District, the Deputy Commissioner of the Bangalore District was requested to report what would be a fair price to charge to bakers for toddy purchased by them.	Do do	

PART II.

FORESTS.
